Caleb Lindelien - Full-Stack Developer

Minneapolis, MN | 952-250-6767 | caleblindelien@gmail.com | LinkedIn | GitHub | Website

SUMMARY

Full-Stack Developer proficient in using Javascript for frontend and backend programming, React, HTML, CSS, API implementing, Node.JS, Express, PostgreSQL, and frameworks like Bootstrap. Experience in a fast-paced Internship with tight deadlines provides an advantage in multitasking efficiently and pushing quality work to production in a timely manner.

TECHNICAL SKILLS

Frontend: HTML, CSS, Javascript, React, JQuery

Backend: Node.js, Express, PHP
Databases: MongoDB, MySQL, PostgreSQL
Tools: Mocha, Chai, Git, GitHub, Gitlab, Heroku, Node Package Manager, Visual Studio Code

---

EXPERIENCE

Nagios Enterprises   St. Paul, MN
Junior Full Stack Developer
09/2022–Present

- Contributed to the success of the company's best-selling products by addressing and fixing complex bugs, as well as developing new feature requests.
- Demonstrated versatility by working both independently and collaboratively, including pair programming with other developers.
- Prioritized user experience design to ensure that the products met the needs and expectations of users.
- Participated in code reviews and testing to ensure high-quality, maintainable code.
- Demonstrated a strong work ethic, attention to detail, and commitment to continuous learning and improvement.

PROJECTS

- **MERN Stack Social Media Platform** | **Poser**
  - Assembled the backend using Nodejs for runtime environment, Express for backend framework, Mongoose for managing MongoDB, JSON Web Token for authentication, and Multer for file upload.
  - Assembled the frontend using React, React Router, Formik & yup for form handling and validation, and MaterialUI for user interface assistance.
  - Implemented modern features such as light and dark modes and made the application mobile responsive.
  - Developed a custom news feed and timeline that allowed users to see latest posts from their followers and people they follow.

- ■ Designed and implemented a user profile system that allowed users to customize their profile pictures, cover photos, and bio descriptions.

- ● **MERN Stack E-commerce Platform** | [Swift](#)
  - ■ Designed and implemented a user authentication system using JSON Web Tokens (JWT) and bcrypt for secure password storage.
  - ■ Developed a product catalog that allowed customers to filter and search for products based on various criteria such as price, category, and brand.
  - ■ Integrated PayPal and Stripe payment gateways into the platform to provide seamless payment processing for customers.

EDUCATION

Thinkful

Certificate, Software Engineering Program   04/2022-09/2022

- ● Learned industry best practices and software development standards focused on JavaScript, HTML5, CSS3, React, Node.js, PostgreSQL, RESTful APIs, algorithms, and data structures.
- ● Developed and deployed mobile-first applications while learning new languages and frameworks, spending several hours per week collaborating with and learning from senior web developers in a mentor-student relationship.
- ● Completed several hands-on role-based and scenario-based projects and virtual labs designed to simulate real-world tasks and challenges.
